

**Amendments to the Claims:**

Claim 19 is canceled without prejudice or disclaimer

This listing of claims will replace all prior versions, and listings, of claims in the application:

**Listing of Claims:**

1. (currently amended) An artificial fingernail package comprising:  
a packaging frame for storing a plurality of artificial fingernails of varying width, wherein for at least one available width there are at least two artificial fingernails having different arch heights; and  
an exterior portion that houses said packaging frame, said exterior portion comprising a transparent portion facing a front of said package, wherein  
said packaging frame comprising a curvature-displaying compartment having at least two different ones of said artificial fingernails and means for retaining said at least two different ones of said artificial fingernails such that at least one of a c-curve and an arch height of each of said at least two different ones of said artificial fingernails is observable outside of said package through said transparent portion of said exterior portion, and wherein said means for retaining comprises a holding material having slits in which said at least two of said artificial fingernails are respectively received.
2. (canceled)
3. (currently amended) The artificial fingernail package of claim [[1]] 14 wherein means for retaining comprises a holding material having slits in which said at least two of said artificial fingernails are respectively received.
4. (original) The artificial fingernail package of claim 1 wherein said packaging frame comprises at least one primary compartment for loosely storing a plurality of artificial fingernails.

5. (currently amended) The artificial fingernail package of claim 1 wherein said packaging frame comprises a further display compartment containing at least one of said artificial fingernails, wherein the top surface of said at least one of said artificial fingernails in said further display compartment is observable outside of said package through said transparent portion of said exterior portion.

6. (original) The artificial fingernail package of claim 1 wherein said packaging frame comprises an adhesive compartment that contains a container of adhesive for applying at least one of said plurality of artificial fingernails.

7. (original) The artificial fingernail package of claim 6 wherein said packaging frame further comprises a pin compartment that contains a push pin capable of piercing a hole in the tip of said container of adhesive.

8. (original) The artificial fingernail package of claim 1 wherein said packaging frame comprises a stick compartment that contains a manicure stick.

9. (original) The artificial fingernail package of claim 1 wherein said plurality of artificial fingernails are molded from plastic.

10. (previously presented) The artificial fingernail package of claim 1 wherein said plurality of artificial fingernails comprises at least one full-cover artificial fingernail.

11. (previously presented) The artificial fingernail package of claim 1 wherein said plurality of artificial fingernails comprises at least one nail tip.

12. (previously presented) The artificial fingernail package of claim 1 wherein said packaging frame is molded from plastic.

13. (previously presented) The artificial fingernail package of claim 1, wherein said exterior portion comprises front and rear sides, said transparent portion facing the front side of said exterior portion.

14. (currently amended) An artificial fingernail package that contains artificial fingernails of varying widths, said package ~~further containing, for at least one of said varying widths, artificial fingernails having a plurality of different arch heights, said package~~ having a front and rear and a first compartment for displaying at least two of said artificial fingernails having a plurality of different arch heights, wherein each of said at least two artificial fingernails has a c-curve, and wherein the c-curve of said at least two of said artificial fingernails is observable from outside said front of said package, and said package having a second compartment with at least one of said artificial fingernails arranged so that a top of said at least one fingernail is observable from outside said front of said package.

15. (previously presented) The artificial fingernail package of claim 13 wherein said package contains artificial fingernails having conventional arch height and artificial fingernails having low arch height.

16. (previously presented) The artificial fingernail package of claim 13 wherein said package contains artificial fingernails having conventional arch height and artificial fingernails having high arch height.

17. (previously presented) The artificial fingernail package of claim 13 wherein said package contains artificial fingernails having conventional arch height, artificial fingernails having low arch height and artificial fingernails having high arch height.

18. (currently amended) A method for packaging artificial fingernails comprising the steps of:

providing a plurality of artificial fingernails of varying width in a package, wherein for at least one available width there are at least two artificial fingernails having different arch heights; and

retaining at least two different ones of said plurality of artificial fingernails in a holding material in said package, said holding material having slits in which said at least two of said artificial fingernails are respectively received such that the c-curve of said at least one of said plurality of artificial fingernails is observable from outside of a front of said package through a transparent portion of said package.

19. (canceled)

20. (previously presented) The method of claim 18, further comprising the step of providing at least a further compartment for retaining a remainder of said plurality of artificial fingernails.
